

Fertilizer Yield Warranty

With input costs rising and cutting into your farm's profits, it's time to look at reducing your reliance on purchased inputs. With support from our staff and a yield warranty, PFI can help you reduce nitrogen applications on your farm - saving you money and increasing your farm's resiliency.

CORN	TIER 1 ELIGIBILITY	TIER 2 ELIGIBILITY
Farmers who make modest cuts in total nitrogen application rates on corn fields that'll be harvested in 2023 will be eligible. If yield is affected, some of the losses will be covered by a yield warranty.	<ul style="list-style-type: none">Applying more than 1.1 lbs nitrogen per yield goalMinimum of 20 lbs/A cut in nitrogen program which includes all forms of nitrogenNo previous soil health required	<ul style="list-style-type: none">Applying more than 0.9 lb nitrogen per yield goalAt least 2 years of any soil health practices:<ul style="list-style-type: none">Cover cropsCover crops + no-tillExtended crop rotation
95% APH WARRANTY PAYMENT if your harvest benchmark yield is not achieved.	\$15 per acre	\$35 per acre

Farmers wishing to cut fertilizer, but applying below these levels still may be eligible to do so. PFI agronomy staff has some discretion with lower initial rates and can talk with you during your initial consultation.

Program Milestones

- Enroll through the PFI website
- Meet with a PFI agronomist to discuss your nitrogen plan
- Apply less total nitrogen
- Attend a soil health learning event with PFI or another pre-approved organization
- PFI staffer reaches out to verify nitrogen plan followed
- Program complete!
